

MSAG Meeting Date	28 September 2022
Venue	Teams Call
Title	MHHS Stakeholder Advisory Group

1. Attendees

Role	Name
Group Member	Jono Liddell
Group Member	Richard Warham
Group Member	Emily Luke
Group Member	Cathy Mulliss
RECCo	Dave Jones
RECCo	Sarah Jones
REC Code Manager	Harriet Truss
REC Code Manager	Neil Brinkley
REC Code Manager	Michael Taylor

Apologies were received from Paul Saker, Mark McGuire and Jon Hawkins.

2. REC Design Issues

The group walked through the list of REC design issues, noting the current position on each item which has been captured in the log, alongside any points raised by group members.

Specific points noted were:

- The two highest priority issues discussed at the last meeting continue to be progressed, with the EES impact assessment due to commence later in the year and the workshop to discuss changes to REC owned data items scheduled for 30 September 2022.
- A number of issues have already been discussed by the CCIAG and the Programme were picking up specific points to be reflected in design artefacts.
- The changes required to the S Number would impact supplier billing systems and therefore required wider consultation with parties. It was agreed that RECCo should consider how to engage with parties e.g. whether a REC CP should be raised in order to gather views. **ACTION MSAG02 – 01.**
- Potential change to the Erroneous Switch and Disputed / Missing Switch Meter Read processes would impact supplier systems and processes. Therefore the issues associated with these processes should also be subject to wider REC stakeholder consultation.
- Some issues relate to design artefacts, with comments fed back through the tranche 4 review. These items will be updated once responses are received. This may result in some items being closed.
- It was suggested that geolocation could be provided as part of a request for a new MPAN. It was agreed that this was not an MHHS consequential change, and should instead be fed back into the wider discussion on address data quality. **ACTION MSAG02 – 02/**

3. MSAG Next Steps

The DTN flow workshop will be held on Friday 30 September 2022. After this, the next scheduled meeting of the MSAG clashes with the MHHS Dissensus Workshop. It was therefore agreed that this meeting would be cancelled and the next meeting will be held on Thursday 28 October 2022.
